POSTER ● ● ● ●

"We will receive research outputs for the Osstem implant to share study results on various clinical cases and the reliability of Osstem implant products evaluated in many institutions and countries in the world."

Research topics and areas

- ① Implant Clinical applications
- ② Implant Technology & Case reports
- ③ Implant Science

1. Receipt: February 1 ~ March 31, 2011
2. Review: OSSTEM implant's Institutional Review Board (IRB)
3. Awards: Awards for all participants; Excellent posters selected on the day will be separately awarded.
4. Inquiries: Osstem Implant, Implant Laboratory Clinical Research Team, Jeong Yeong-A
Tel: 82-51-850-2541/ Fax: 82-51-851-4341 / E-mail: research@osstem.com

Global AIC Hands-on Course (Friday, 3rd June)

Type	Director	Topic
3-A	Dr. Cho, Yong-seok (English Class)	Conventional sinus lift technique Alternative methods to avoid sinus bone graft Indication and limitation of crestal approach sinus bone graft Special instruments for crestal approach sinus bone graft Hands-on with dentiform model Management of sinus bone graft complications
3-B	Dr. Ham, Byung-do (English Class)	FASTG: gingival graft & connective tissue graft Pedicle graft: gingival graft & connective tissue graft Mucogingival surgery: Vestibule deepening procedure-1 Fenestration procedure Mucogingival surgery: Vestibule deepening procedure-2 Edlan-Mejchar procedure Mucogingival surgery: Hands-on practice

Global AIC Hands-on Course (Saturday, 4th June)

Type	Director	Topic
4-A	Dr. Jeon, In-seong (English Class)	Achieving of Esthetics & Functioning in Anterior Implants for Harmonious combination and its clinical application from surgical & prosthodontic & periodontic aspect There are many factors that affect esthetics & functions in upper anterior region. As we know, the most dominant factor is a precise drilling toward the lingual side. But Clinically, following surgery, making a temporization has an important meaning for emergence profile in point of labial & proximal contouring. Of course, all these procedures have to related to biotype evaluation and also tooth extraction or not. So I am very glad to organize all situation according to 1. Bone evaluation with tooth extraction or not GBR techniques or Ridge split techniques or Block bone grafting techniques in upper anterior area 2. Flapless surgery or Limited flap surgery or Wide flap surgery According to tooth extraction or not According to Connective tissue graft or not for biotype conversion 3. Non occlusal immediate loading for emergence profile using Rigid abutment system 4. Final prosthesis making from 1st and 2nd and final emergence profile
4-B	Dr. Lee, Dong-ho (English Class)	Prosthetic restoration for completely edentulous patients with implants Introduction to the Course Diagnosis and treatment planning for completely edentulous patients Biomechanical consideration for implant prostheses / Fixed Complete Denture(FCD) Review of various techniques to fabricate FCDs (Hands-on) Fixed Complete Denture (DEMO presentation) Implant Overdentures (IOD) Treatment planning for IOD patients Overall treatment sequence for fabricating IOD w/ various retentive components (Hands-on) Implant Overdenture - Ball abutments and O rings (Hands-on) Implant Overdenture - ZEST LOCATOR® Review of the scientific articles related to the prosthodontics of IOD and FCD Summary of the presentation

Global AIC Hands-on Course (Monday, 6th June)

Type	Director	Topic
6-A	Dr. Hong, Yoon-euy (English Class)	Hard and soft tissue augmentation for the anterior esthetic enhancement 1. Biologic principles 2. Currently available techniques 3. Clinical applications 4. Hands-on and Q&A
6-B	Dr. Cho, Hyun-ki (Chinese Class)	The implant basic concepts for prosthetic work Biomechanics & occlusal scheme of implant Implant provisional & final restoration Simple impression for implant prosthesis Esthetic implant Removable implant prosthesis (overdenture) Step by step approach for fixed implant prosthesis Solutions for the compromised Case Maintenance of implant

OSSTEM Symposium (Monday, 6th June)

Time	Director	Topic
Morning	Dr. Lee, Dae-hee (Chinese Class)	1. Step by step of crestal approach using CAS kit 2. Lateral approach without failure
Afternoon	Dr. Oh, Young-hak (Chinese Class)	1. G.T.R vs G.B.R 2. Ridge split technique 3. Immediate loading
