

## LITERATUR

**Thema:** Neues Kombi-Transplantat in Biomaterialien

**Autor:** CAMLOG Vertriebs GmbH

---

1. Cerabone® plus usability test.
2. 78.5% of users reported easier or much easier application compared to particulate material without hyaluronic acid; Data on file: Customer survey among 156 clinicians.
3. Tadic et al. Comparison of different methods for the preparation of porous bone substitution materials and structural investigations by synchrotron  $\mu$ -computer tomography. Mat.-wiss. u. Werkstofftech. 2004, 35, No. 4.
