

U 6000 S | Premium class

U 6000 S. The new premium standard.

This premium treatment unit is impressive due to not only its spectacular new design entirely in white, but also the revolutionary vision U multimedia system. With the U 6000 S, ULTRADENT is setting new standards. The elegant combination of technology and convenience help you to reach new goals. There is also a full-touch display available for your dental assistants. Experience ULTRADENT's top-of-the-range unit in your dental practice. Your team and patients will be impressed too. Indulge in perfection.

U 6000 F. The mobile premium class.

ULTRADENT's premium range also includes a treatment unit with a mobile dental unit. The dynamic concept of U 6000 F, together with vision U, opens up a world of opportunity in modern dentistry. The new armrests with a moveable arm support mean increased comfort for patients and thus increased safety for the dentist. The cart allows optimum access to the instruments in any treatment situation and an ideal view of the colour touchscreen. Indulge in this dynamism.

U 1600 | Premium class

Premium class

U 1600. The innovative premium class.

The U 1600 treatment unit is ULTRADENT's innovative take on a modern treatment unit. Here, the art lies in our expertise. Be inspired by its impressive performance. Each instrument is ideally positioned, ready for you to pick up – instinctively and effortlessly. You benefit from the security offered by a trusted brand, as well as by easy-to-operate full-touch displays on both sides, while your patients feel comfortable and safe. This can partly be attributed to leather, soft or massage upholstery, armrests with a moveable arm support and various head cushions. Indulge in this innovation.

vision U. Much more than just multimedia.

With vision U, ULTRADENT realizes many technical visions and achieves the fascination of a future-oriented dental practice even today. vision U, the interactive multimedia system, will be available for all ULTRADENT treatment units from all classes as of April 2015. vision U now provides enhanced hardware functions such as the high-resolution presentation of images and videos. The entertainment mode now shows images and videos in full HD. An HDMI input has been created for this purpose, to which external devices can be connected. The camera workflow has also been simplified and optimised.

U 3000 | Compact class

U 3000. The mobile compact class.

The mobile U 3000 dental unit has a stable, non-tilting frame. Six holders can be individually equipped with up to three micromotors, an electrosurgery unit, polymerization lamp and intraoral camera. With its tried and tested technology, versatile fittings and innovative modular structure, U 3000 comes very close to meeting the standards of the premium class. As of 1 April 2015, this treatment unit too can be fitted with the revolutionary multimedia system vision U.

Compact class

U 1302 Edition. Close to the premium class.

Thanks to its competence and experience, ULTRADENT is setting a new standard for the compact class with the new U 1302 Edition unit. With innovative ideas and new equipment options, we are redefining versatility and reliability. U 1302 Edition includes a range of premium features that make this compact treatment unit a real all-round talent. Five automatic programs for chair control, up to three micromotors, an integratable electrosurgery unit and settings or preselection in 10 %-stages are now available. Test the very new compact class.

U 1301 Left/Right. The variable compact unit.

This treatment unit was developed on the basis of the U 1301 compact unit and this provides optimum reliability. The unit can be converted from left-handed to right-handed quickly and easily by just one person, with no need for any tools. U 1301 L/R also offers all the features a modern practice would expect. The typical fitting features and options that are standard for all other ULTRADENT treatment units apply to U 1301 L/R too.

easy Prophylaxe. The prophylaxis unit.

You will make this treatment unit a modern focus point of your practice if it is important to you that your instrument holder is located at the side that faces you, the dentist. This opens up new dimensions in ergonomics and practical efficiency during treatment and preventative work, such as professional tooth cleaning. The fitting options of the dental unit also include an integrated prophylaxis air polishing unit. And, of course, vision U is optionally available for this prophylaxis unit for communication with the patient.

easy KFO 1 | easy class

easy KFO 1. The compact orthodontic unit.

easy KFO 1 is the result of over 25 years' development in orthodontic dentistry treatment units. The space-saving 'easy' concept, consisting of a water supply unit and swivelling instrument holder with an operating panel, can also be used with one hand, thus reinforcing the system's ergonomic and hygiene quality standards. It goes without saying that modern electric micromotors and other instruments can also be accommodated. As visual communication is necessary in orthodontics, the easy class too can be fitted with the revolutionary multimedia system vision U.

easy KFO 2. The multifunctional unit.

easy KFO 2 combines all the benefits of the successful U 1307 unit with the 'easy' concept. The instruments are positioned in an ergonomic and space-saving manner on a swivelling holder. The short chair base provides the dentist with maximum free space and proximity to the patient. Ease of use and high reliability make this workstation a multi-purpose marvel for all treatment concepts. This concept is also highly suitable for small rooms and can likewise be fitted with vision U.
